

Patient:

Maria Garcia

Date of Discharge:

June 23, 2026

Surgeon:

Dr. Chen, Orthopedics

Procedure:

Left knee arthroscopy with meniscus repair (Procedure Code: 29882)

Activity Restrictions

- No weight-bearing on left leg for 2 weeks. Use crutches or walker at all times.
- Keep the surgical site elevated above heart level for the first 48 hours.
- Apply ice packs for 20 minutes every 2–3 hours for the first 72 hours.
- No driving until cleared by your surgeon (typically 4–6 weeks post-op).
- Avoid stairs unassisted for the first week. Arrange for ground-floor living if possible.
- No bending the knee beyond 90° until cleared at your 2-week follow-up.
- Keep wound site dry — no bathing, pools, or hot tubs until sutures are removed.
